PIN TYPE CIRCUIT BREAKER LOCKOUT
Pin type circuit breaker lockout device is used to provide locking to the miniature circuit breaker that is with appropriate small holes, squeeze from the back to open the jaws of the lockout device and then fix or lock it properly in the small hole of the MCB. Can be used for one, two, three or four pole circuit breaker, required no tools for installation and available as pin in, pin out and pin wide type.
**Pin in, Pin Out, Pin Wide Circuit Breaker Lockout**

Pin type circuit breaker lockout device is used to provide locking to the miniature circuit breaker that is with appropriate small holes, squeeze from the back to open the jaws of the lockout device and then fix or lock it properly in the small hole of the MCB. Can be used for one, two, three or four pole circuit breaker, required no tools for installation and available as pin in, pin out and pin wide type.

- **Material** – Nylon, ABS, Metallic PIN and Spring
- KRM Pin In/Out/Wide Circuit Breaker Lockout is applicable on the circuit breakers for energy isolation, always used when energy source is in switched OFF condition.
- The device can be installed directly without the assistance of any extra tool, having high tensile strength and is suitable for single, double, triple and four pole circuit breaker.
- Length of Pin can be expanded up to 8.5 mm on pressing the back side with the help of thumb.
- **Color** – Green Black, Red Black, Yellow Black, Blue Black options or as per the quantity required.
- **Outer Size** – Overall length in closed Position 43 mm, Edge Width at Green end 16.5 mm, Centre Width at Black Portion 17 mm, Grip Holder Black Length 24 mm, Grip Holder Black Width 24 mm
- **Weight** – 7 gm

For more details on LOTO and Safety Products visit our website – www.krmcorporation.com
Notes:

• Lock & Tag should be used with all loto products.

• For group locking on particular energy hasp should be used.

• Group lockout box should be used for group lockout tagout.

• Scissor Cable or Round cable lockout can be used to lock multiple hazardous energies instead putting individual locks & tags.
